**Join the open-source foundation powering the world's most
scalable storage platform, hosted by The Linux Foundation.**

What Is Ceph?

Ceph is an open-source distributed storage system that delivers object, block, and file storage from a single platform. It scales from gigabytes to exabytes on commodity hardware with no vendor lock-in or single point of failure, thanks to Ceph's self-healing from hardware failures. The first commit was in 2007. The first production deployment was in 2012.

The Linux Foundation Model Works

The Linux Foundation model has proven itself across the most critical infrastructure software in the world.

Kubernetes / CNCF

200K+ contributors

Started as an internal Google project. A neutral foundation turned it into the backbone of modern cloud infrastructure — adopted by every major cloud provider.

Linux Kernel

Estimated \$41B value

More than 4,000 developers at hundreds of competing companies collaborate under a shared governance model. No single organization controls the direction.

PostgreSQL

#1 Ranked DB, 2024

Community-governed for over 35 years. Trusted by Apple, Instagram, Spotify, and countless enterprises. Sustained without fees — through shared ownership.

The Ceph Foundation

The Ceph Foundation follows the same model of member-funded, community-driven, and Linux Foundation supported.

- Neutral home for all Ceph stakeholders, which are developers, operators, vendors, cloud providers, and researchers.
- Members pool resources to fund CI infrastructure, documentation, events, and community programs.
- Members influence strategic direction without controlling technical decisions, those remain with the Ceph Steering Committee (CSC).
- Governing Board with elected representation across all tiers meets quarterly.

Mission & Vision

MISSION

Empower Ceph developers, users, and operators to innovate, adopt, and sustain Ceph as the leading open-source storage solution through collaboration, shared resources, and a commitment to openness.

VISION

A future where every organization, regardless of size, can access scalable, reliable, and cost-effective storage without vendor lock-in. All powered by a thriving global community.

Why Organizations Join

01 Strategic Influence

Input into roadmap priorities and community investment decisions through the Governing Board. Your organization's needs get a seat at the table.

02 Brand Recognition

Logo placement on ceph.io, presence Ceph Days, co-marketing opportunities, and the ability to post jobs directly to the Ceph talent pool.

03 Ecosystem Collaboration

Direct relationships with IBM, Bloomberg, CERN, and 30+ other organizations shaping the future of open-source storage.

04 Community Investment

Support the Ceph community infrastructure, documentation, meetups, and mentorship programs that keep Ceph contributors active and the project healthy.

Member Benefits

Benefit	Silver	Gold	Platinum	Diamond
Brand logo displayed on ceph.io	✓	✓	✓	✓
Post jobs to the Ceph website ♦	—	✓	✓	✓
Twice-yearly meetings with board rep ♦	✓	✓	—	—
Eligible to run for Governing Board seat(s)	✓	✓	—	—
Eligible to run for Gold Governing Board seat(s)	—	✓	—	—
Guaranteed seat on the Governing Board	—	—	✓	✓
Board rep eligible for officer positions ♦	✓	✓	✓	✓
Influence over strategic direction and budget	—	—	✓	✓

Membership Levels

Diamond

\$100K/yr

Guaranteed board seat.
Officer eligibility.
Maximum influence.

Platinum

\$50K/yr

Guaranteed Governing Board seat. Full benefit access.

Gold

\$30K/yr

Two elected board reps. Job posting access.

Silver

\$15K/yr

Elected board representation.

How We Measure Success

Membership Health

- $\geq 95\%$ annual member renewal rate
- +1 paid member minimum per year
- 2.5% YoY revenue growth target

Governance & Transparency

- ≤ 5 business days to route funding requests
- ≤ 30 days to Board decision
- 4 Governing Board meetings per year

Events & Community

- 4 quarterly public community updates
- $\geq 10\%$ attendees from underrepresented groups
- 100% of events include deliberate outreach efforts

Marketing & Outreach

- +10% YoY website & content engagement
- 1+ major conference presence per year
- 1+ emerging use-case campaign per year (AI/ML, edge, cloud-native)

Project Roadmap & Status

Pacific (v16)

2021–2024

Archived

Simplified management and upgrades using cephadm, launch of stretch cluster support, RBD live migration, S3 select

Quincy (v17)

2022–2025

Archived

Release focused on resolving scalability issues discovered during large scale testing with Pawsey supercomputing, first release to provide QoS support

Reef (v18)

2023–2026

Archived

Support for multi-site resharding in RGW, RGW Compression supported for objects uploaded with Server-Side Encryption, significant RocksDB performance improvements, Cache tiering deprecation

Squid (v19)

2024–2026

Current Stable

Crimson OSD TP advancing toward production readiness, performance improvements targeting AI/ML and high-throughput workloads, DR feature improvements

Tentacle (v20)

2025–2027

Current Stable

Latest GA release with much lower TCO and improved performance for Erasure Coding, Next-Gen objectstore SeaStore TP, expanded S3 API Compatibility, several security and management improvements

Umbrella (v21)

2025–present

In Release Candidate phase

Expected GA in Q32026, further performance improvements in EC, EC OMAP support, RGW full object dedup, ceph-mgr scalability, robustness improvements

Ceph releases follow alphabetical sea-creature naming. Roadmap priorities are set by the Ceph Steering Committee (CSC).

How to Join

The Ceph Foundation welcomes many types of organizations who are engaged in or committed to supporting the Ceph project.

1

Choose Your Tier

Select the membership level that fits your organization's scale and goals. Reduced rates are available for organizations with fewer than 200 employees.

2

Complete Enrollment

Complete the enrollment form at enrollment.lfx.linuxfoundation.org/cephfoundation and sign the member agreement through The Linux Foundation.

3

Get Onboarded

Our Operations Manager will connect your team with the Governing Board, get your logo on ceph.io, and help you get the most from day one.

Shape the future of open-source storage.
